Hard

POM Seam Roller (Fluric coating)

POM roller is suitable for Heavy duty wallcoverings. By Fluric coating, surface of roller is not stained.

POM Seam Roller

POM roller is suitable for Heavy duty wallcoverings. Do not use this roller for delicate wallcovering and wool wallcoverings, because crush the surface material of the wallcoverings.

Urethane Roller

Urethane roller is softer than POM roller. Urethane roller is suitable for Textile wallcoverings and Soft vinyl wallcoverings.

Soft Urethane Seam Roller

Soft Urethane roller is softer than Urethane roller. Soft Urethane roller is suitable for Paper wallcoverings.

High Urethane Seam Roller

High Urethane roller is softer than Soft Urethane roller. High Urethane roller is suitable for Most Delicate wallcoverings. High Urethane roller has some elasticity, therefore, This roller prevents the transformation of Delicate wallcoverings.

Soft

Our Seam Roller with resin Bearings. For good smooth!
